Our project started in November 2022 and will end in May 2023.

Our project includes students between the ages of 10-20 who need special education.

The Project;
It aims to provide students with Special Education Needs skills to use their mathematical knowledge in daily life situations.
In this learning area, students are expected to use their mathematical knowledge and skills to properly manage their work life, home life, money, leisure time, health, personal responsibilities and relationships.

ABOUT THE PROJECT

In Project Scope
• We will prepare studies that will bring together students with special education needs from different countries.
You will be given the opportunity to learn math skills by experiencing them in real life environments.
In addition, the activities carried out are to develop the skills of our students to use web 2.0 tools actively.

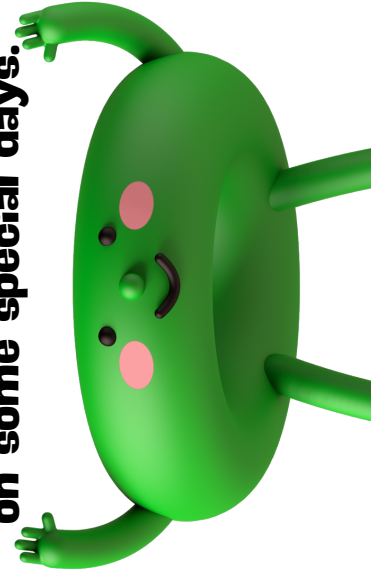

OBJECTIVES

- To enable students who learn to use mathematics every day to see mathematics as important and valuable and to be more interested.
- Preparing a Mathematics street in real or virtual environment with the studies done

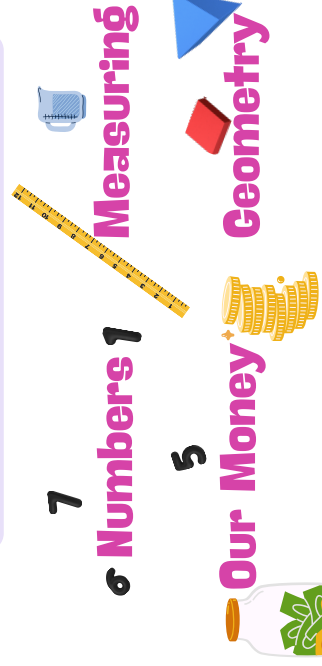

EXPECTED RESULTS

safe Internet day
International Day of Persons with Disabilities
Autism Awareness Day
Down Syndrome Day
New Year

Joint events will be organized on some special days.

Our Monthly Themes

Activities created on monthly themes will be carried out with selected project students under the guidance of teachers.
